Eriez® Designates Eco-Certification for Hi-Vi Compact Electromagnetic Feeders

Erie, PA--- Demonstrating its commitment for a better, cleaner environment, Eriez® has developed an eco-certification designation for a variety of its industrial products, including the company's entire line of [Hi-Vi Compact Electromagnetic Feeders](#).

Eriez' Hi-Vi Compact Electromagnetic Feeders meet criteria established by Eriez for its Eco-Certified designation:

- These feeders have a positive impact on recycling processes and the recycling industry
- They are manufactured with energy-savings features, including the use of energy-free permanent magnets, keeping power consumption low
- The feeders are built in an Eriez facility that focuses on recycling consumables, driving down energy usage and drastically reducing solid landfill waste
- An electronic, paperless format is used when promoting the Hi-Vi compact feeders; when marketed using hard copy, promotional material is printed on recycled paper

Eriez has incorporated a completely digital workflow, both internally and externally, to reduce its dependence on paper. Customers can now access most product information via the Eriez Web Site at www.eriez.com and print only what they need, including specs and details about Hi-Vi Compact Electromagnetic Feeders.

Eriez Hi-Vi Compact Electromagnetic Feeders, with their totally enclosed patented magnetic drive, can feed practically any bulk material from micron size to bulky chunks. Solid-state controls operate the feeders with "watch-like" precision while keeping power consumption to a minimum to save energy. Eriez has standard models for the majority of applications.

Special features, such as multiple drives, enclosed trays or screens, can be designed for the best solution for a customer's application. In addition, a variety of standard and special trays are available.

-More-

Eriez is recognized as world authority in advanced technology for magnetic, vibratory and inspection applications. The company's magnetic lift and separation, metal detection, x-ray, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, recycling, mining, aggregate and textile industries. Eriez manufactures and markets these products through ten international facilities located on six continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada. For online users, visit www.eriez.com or send e-mail to eriez@eriez.com. Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506.
